Abstract
In this paper we describe the implementation of a cooperative online game in HTML5 inspired in the successful game Portal by Valve.

ACM Classification Keywords
H.5.m [Information interfaces and presentation (e.g., HCI)]: Miscellaneous.

General Terms
Cooperative, HTML5, online game, portal

Introduction
This format is to be used for submissions that are published in the conference extended abstracts. We wish to give this volume a consistent, high-quality appearance. We therefore ask that authors follow some simple guidelines. In essence, you should format your paper exactly like this document. The easiest way to do this is simply to download a template from the conference website and replace the content with your own material.

Figure 1: Insert a caption below each figure. Images can "float" around body text, like this example.
